PROFILE

As a second year BTech student, I am dedicated to expanding my knowledge and skills in the dynamic field of computer science. I am eager to contribute to projects and explore while getting invaluable insights and experiences along the way.

PROJECTS

1. Networked Whiteboard integrated with Chatbot (TCP client-server) using Python.
2. PlanPro

Description : Developed a web application to help users achieve their goals by generating optimised study plans based on user inputs. The application leverages modern web technologies for full-stack development and incorporates basic machine learning algorithms and GPT-3 for plan optimisation.

Technologies used: React, Express, MongoDB, Node.js, JavaScript, HTML, CSS, Python.

Practice projects:

1. Full stack (MERN) E-commerce website
2. Movie Recommendation System (using python, scikit learn and streamlit).
